

**AMENDMENTS TO THE SPECIFICATION**

Please replace the Title of the Invention with the following Title of the Invention for this application.

INFORMATION DISPLAY METHOD AND INFORMATION DISPLAY  
SYSTEM FOR FINDING ANOTHER USER IN A PLURALITY OF USERS BASED  
UPON REGISTERED INFORMATION

Please replace the paragraph beginning on page 8, line 18 with the following paragraph.

Fig. 3 is a diagram showing an example of the configuration of the server 10. A controller 11 includes a CPU. The controller 11 executes write and read control of data, transfer control of data, control of each unit in the server 10, various calculation processings, and stores temporarily data, and the like. For example, a ~~communicator~~ communication device 12 receives data from the terminal 20, and transfers them to the controller 11, and also transmits the data transferred from the controller 11 to the terminal 20. Furthermore, the below files are stored in a predetermined memory unit in the server 10.

Please replace the paragraph beginning on page 2, line 7 with the following paragraph.

It is therefore the object of the present invention to provide an information display method for displaying information for easily finding out ~~a other~~ another user in conformity with a user's object of access, in a virtual space displayed on a terminal; and a system for executing the same.
